

# DV Ring Light for Brookfield Viscometers

## Illuminate Precision

Introducing the DV Ring Light – engineered to enhance visibility and precision in viscosity measurements. Designed exclusively for Brookfield viscometers, this accessory transforms low-light lab environments into well-lit workspaces, ensuring optimal clarity for spindle immersion and documentation.

### Features

- **Universal Compatibility\***: Works with all current and legacy DV and Analog Viscometers
- **Integrated USB Power & Auto On**: Direct USB-A connection provides power and automatic startup (optional US wall adapter available)
- **Adjustable Illumination**: Built-in dimmer delivers bright, uniform lighting for visibility and photo-quality documentation
- **Slim, Ergonomic Mounting**: Compact profile with easy left-side controls and secure pivot cup attachment
- **Instrument Protection**: Screw protectors prevent damage to the viscometers pivot cup

*\*Can not be mounted in conjunction with pivot cup mounted accessories*

### Advantages

- **Purpose Built for Brookfield Instruments**: Designed and engineered specifically to meet performance standards
- **Plug and Play Operation**: No software, no calibration simply connect and it powers on automatically with the viscometer
- **Optimized for Real Lab Conditions**: Delivers reliable performance in low-light environments where precision is critical
- **User Centric Controls**: Left-side dimmer placement provides intuitive, easy access during testing
- **Genuine Brookfield Accessory Support**: Fully supported by Brookfield
