

DV Create™ Software

Advanced Method Building, Real-Time Monitoring & Data Management for DV2Plus

Elevate Your Viscosity Testing with DV Create

DV Create™ is the essential software companion for your DV2Plus Viscometer. Designed to streamline your viscosity testing workflow, DV Create enables real-time data monitoring, advanced method creation, and seamless test result management – all from your PC. Whether you're converting legacy files or building complex multi-step programs, DV Create delivers the precision, flexibility, and efficiency you need.

Experience the next level of viscosity testing

KEY FEATURES & BENEFITS

Live Data Monitoring

- View real-time torque, viscosity, speed, and temperature readings
- Graphical display with test status indicators
- Automatic transition to results page upon test completion
- Automatic data transfer from instrument to PC

Advanced Method Building

- Create and manage up to 25-step test programs
- Define multi-step routines, QC limits, and HPQA integration
- Convert DV2T and DVNext method/result files for DV2Plus compatibility
- Import/export programs via USB flash drive

Note: Test setup is performed on the instrument side.

Test Result Management

- Export results in PDF, XML, or CSV formats
- Generate print-ready reports with full metadata
- Datalogging and export functionality for streamlined reporting

Saved Data Access

- Instantly reopen and review previously stored test files
- Simplified historical data tracking and file management

Connectivity Options

- Bluetooth® 4.2+: Wireless, auto-reconnect, guided pairing
- USB-B: Plug-and-play, reliable direct connection

Compatible Instrument

- DV2Plus Viscometer

MINIMUM SYSTEM REQUIREMENTS

OS: Windows 10/11 (32/64-bit)

Processor: 2 GHz or faster

Memory: 8 GB RAM

Storage: 100 GB available

Display: 1920 × 1080 resolution

Ports: USB or Bluetooth 4.2+

Why Choose DV Create™?

DV Create™ simplifies complex viscosity testing by combining powerful features with an intuitive interface. From real-time monitoring to advanced method creation and legacy file conversion, DV Create is built to enhance your lab's productivity and data integrity.

Download & Trial
